

Chapter One: The Beginning

This is the first chapter of the test EPUB. The converter should extract this text and render it into a searchable PDF in reading order.

The quick brown fox jumps over the lazy dog. This sentence verifies that text rendering works correctly across page boundaries.

A Subsection

Subsection content goes here. The heading hierarchy should be preserved with appropriate font sizes.

- First list item in the ebook
- Second list item with more detail
- Third list item to verify list rendering

Chapter Two: Conclusion

This is the second chapter. It should start on a new page in the generated PDF, following chapter one.

The EPUB to PDF converter parses the EPUB archive using JSZip, reads the OPF spine to determine chapter order, then extracts text blocks from each XHTML document.

This is a blockquote in the ebook. It should be rendered with indentation.

End of the test ebook. The conversion is complete.
